

NETest

Remote network cable tester

The NETest Network cable tester is a simple but comprehensive cable tester that will diagnose wiring faults for 10 BASE2 (Coax), 10 BASE-T, 100 BASE-Tx, TIA-586A, TIA-568B & Token Ring cables. It will not only identify wiring faults such as open wires, shorts, reversed pairs, crossed pairs, split and mis-wiring, but also will identify up to 4 different cables from the tested end. With a push of a button, the NETest will automatically scan all wires and pairs to determine any existing faults. A large alphanumeric LED displays the fault code; while a series of smaller LEDs indicate which pair the fault is existent on. For testing of installed cables, 4 remote terminators are provided. The terminators are also used to identify which cable is being tested.

Features

- Split tests cable length: Min. 1.2M (about 4 ft.) Max. 150M (about 492 ft.)
- Can identify the following faults: open, short, crossed, reversed, and split
- Can identify up to 4 different cables on the other end by using 4 provided remote identifiers
- Simple and effective use
- A large display LED and 4 wire LEDs clearly display the fault status
- Designed with one 9V DC battery for longer operation and rasy replacement

Fault Code

split pairs

open pairs

mis-wire

short pairs

reversal pairs

crossed pairs

low battery

Specifications

- Model No.: 256450
- Display: LED bar
- Testing main unit interface: RJ45 x1, BNC x 1
- Remote unit interface: RJ45+BNC
- Office ID: Yes
- ID #: 4
- Remote test: results display on the master unit
- Faults display: alphanumeric LED faults display
- Faults detection: open, short, reversed, cross, split
- Low battery indicator: Yes

Order Information

256450 NETest with remotes #1, 2, 3, 4

256451 NETest with remotes #1

256451R Remotes # 2, 3, 4
