Multimode Fiber Test Kit

Overview

The **ZOOM II / Dual OWL Test Kit** is ideal for LAN managers and installers who need to do simple attenuation tests on their multimode networks.

The **ZOOM II (Zeroed Output Optical Meter)** is an economical fiber optic power meter. It provides accurate testing of multimode fiber cables. The 4-digit 7-segment LED display shows power readings with a resolution of 0.01dB. On-screen indicators display measurement units (dBm, dB, uW), as well as battery life. The ZOOM II comes configured with a 2.5mm universal connector for connection to ST or SC connectors, as well as any other fiber connector with a 2.5mm ferrule.

The **Dual OWL** is our 850/1300nm NIST traceable multimode light source. Its dual wavelength outputs are temperature-stabilized for accurate measurements. The Dual OWL has two connector options: ST or SC.

Features

- Economical option for quick attenuation and loss testing of multimode networks at 850 and 1300nm
- Easy-to-read 4-digit 7-segment LCD display
- Store reference values for calibrated wavelengths
- Intuitive 2-button interface on both units
- On-screen wavelength, measurement units, and low battery indicator
- NIST traceable
